

The Wisconsin Chapter of the  
Congress for the New Urbanism Invites you to:

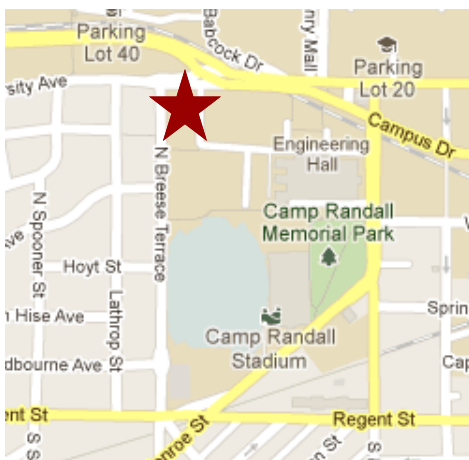

# ***Street Design For Living***

**Speaker: Ken Voigt, PE,**

UW Milwaukee Adjunct Professor of Engineering,  
Senior Transportation Engineer at Ayres Associates, and  
President of the Wisconsin Chapter of the  
Congress for the New Urbanism

Streets are too often designed for one purpose: moving the maximum number of cars in the shortest possible period of time. But what would streets look like if they accommodated people of all ages and abilities, promoted healthy urban living, social interaction and business, as well as the movement of people and goods and regeneration of the environment? How will the form and function of streets change as we adopt new technologies? Join the Wisconsin Chapter of the Congress for the New Urbanism for a look at innovative street design techniques that are being implemented today, and to look forward at what street design could be in the future.

**Monday, November, 14 2011, 7:30 p.m.**  
**Room 1025, Engineering Centers Building**  
**1550 Engineering Drive, Madison**

Presented by:

*Parking available in Lot #17, to the south of 1550 Engineering Dr.*
