How to Ride

**Just follow these four easy steps
on the next two pages:**

**Step 1. Find your route on
the System Map.**

Step 2. Read the schedule.

Step 3. Choose the right fare.

Step 4. Catch your bus!

Step 1. Find your route on the System Map

The Metro System Map shows all Metro routes. Be sure to look at both the Weekday and Supplemental School Day Service maps for weekday travel, and the Weekend & Holiday Map for travel on those days. Use the System Map to locate the route closest to your origin and destination point. You may find that you'll need to ride more than one route to reach your destination; in that case, please read the "Transfer Connections" section on page 7.

If more than one route is needed to complete the trip, find the transfer point where both routes meet for your connecting information.

Now that you've determined which route(s) you're going to ride, you'll need to refer to the appropriate schedule(s).

Step 2. Read the Schedule

How to Read a Schedule.

Destination and Directional Symbols: Schedules and maps contain symbols for points of interest, popular destinations, accessibility, and transfer points (see page 3 of this booklet for an explanation of these symbols). Symbols appear on the map and above the appropriate time point on the schedule—indicating the direction the bus is traveling and the popular destinations and points of interest along the route.

Return Trip: Check the system map and schedule for your return trip. It may not be the same route, depending on the time of day you will be traveling.

Route Number

Streets that the bus travels on are indicated in dark text; cross streets are indicated in white text.

Time Point: Find the time point number on the map that precedes your departure location—then look up that time point number on the schedule. All time point numbers correspond to a time point on the schedule below.

Day of week - weekday, weekend or holiday

Direction - eastbound, westbound, northbound or southbound. Destination gives an indication of direction.

Time of day - AM or PM (PM is in bold type)

Arrival/Departure Time: Read the times from left to right. Your arrival time will be to the right of your departure time.

Comes From Route & Bus Becomes: Schedules also contain columns that indicate what route the bus comes from at the first time point, and/or what route the bus becomes once it reaches the last time point.

Vias: Some buses operate via different streets to/from their destination. In this case trips on Route 28 operate either via Johnson & Fordem or via Sherman to the North Transfer Point. Be sure to follow the timepoints along the schedule and the map to determine if you will be affected by a route via.

Time Points: Departure times are listed below the time points. (Remember that the listed departure time is only for that specific time point. If you plan to board at a stop between two time points, you'll need to adjust the time accordingly.)

Make sure you are waiting at the correct location and your stop is appropriate for the direction the bus is traveling.
Wave to the driver when you see your bus approaching.

Never run after a departing bus. For your safety, buses will not load passengers after they pull away from a stop or transfer point loading area.

Smoking is *not* allowed inside bus shelters.

Where to Wait!

Wait at Sign!

Bus stop is past the intersection—wait at sign.

Wait at Corner!

Bus stop is before the intersection—wait at corner.
(The back of these signs direct you to board the bus at corner.)

Wait at Sign!

Destination Signs

To ensure you're boarding the correct bus, check the vehicle route number and destination on the sign above the windshield. If a route is traveling by way of a certain street, the "via" will flash after the route name.

Bring your bike on your next commute.

- Always approach the bus from the curb side.
- Tell the driver that you are loading a bike.

Watch video

Loading Your Bike

1. Squeeze handle and pull down to release folded bike rack.

2. Lift bike onto the rack, putting the front and rear wheels in the slots. Load the rack nearest the bus first. *The front wheel of the bike closest to the bus should face curbside. The front wheel of the second bicycle must face the bus driver's side.* You can load/unload rack nearest the bus without unloading the bike in front.

3. Raise the support arm, as far up on the wheel as you can, making sure it is resting on your front tire, not on the fender or frame.

Unloading Your Bike

- Tell the driver you need to unload your bike.
- Move the support arm down and lift out your bike.
- Please fold up the rack if it is empty.

Rules of the Rack

For safety reasons, the driver cannot get off the bus to assist you.

Bike racks are first come, first served. Each bus can carry two bikes. The front wheel of the bike closest to the bus should face curbside. The front wheel of the second bicycle must face the bus driver's side.

There is no additional fare for using the bike rack.

Children 10 and younger must be accompanied by an adult to load and unload bikes.

All people using the rack must be strong enough to load and unload their bike.

Bikes are not allowed inside the bus.

Tell Your Friends! Go Green – Ride Metro

Recent studies show one of the most significant actions people can take to reduce their carbon footprint is to reduce their driving. Riding the bus helps to create a healthier environment by reducing smog-producing pollutants and greenhouses gases.

Metro is a Part of the Solution Hybrid Buses

Metro has 19 hybrid buses in its fleet!

Watch video

What is a hybrid bus? Hybrid bus motors act like generators. Through a process called "regenerative braking", energy created while a bus slows or stops is converted to stored electric energy. Forty percent of the energy to accelerate the bus is actually energy saved during the braking process.

Metro currently estimates that hybrid buses get 20-30% better gas mileage than regular diesel buses and reduce exhaust emissions by 90%.

Ultra-Low Sulfur Fuel

Metro's entire fleet operates on ultra-low sulfur diesel fuel that reduces hydrocarbon emissions by 75%.

Green Power

Metro Transit uses 37% Green Power, which is a combination of windpower and other environmentally-friendly energy-producing sources, to power its administration and maintenance facility.

Look for QR Codes at your Stop or Shelter

QR codes are being added to printed schedule displays that provide links to real-time bus arrival information.

How Do I Use QR Codes?

- 1** Install any free QR reader app on your mobile device.
Do a search for "QR code reader" in your favorite app store.
- 2** Using the app, scan the QR code displayed at the stop.
- 3** The code will bring you to a Metro landing page in which you can find real-time arrival times for your specific stop.

Try it out here!

QR codes have already been installed at some downtown stops, including all UW campus, State Street and Capitol Square stops. Look for the codes near the bottom of the schedule information.
